

Udit Chand Narayan

Jodhpur, India — +91-7376793856 — nrynudt@gmail.com — udtc.me — [LinkedIn](#) — [GitHub](#)

Education

Indian Institute of Technology (IIT) Jodhpur

Master of Technology (M.Tech)

2025 – 2027

Jodhpur, India

University of Lucknow

Bachelor of Technology in Electronics & Communication Engineering

2021 – 2025

CGPA: 7.37/10

Technical Skills

Programming Languages: Python, C++, JavaScript, TypeScript, HTML/CSS, SQL

Frameworks & Tools: Next.js, React, Node.js, Flask, Django, REST APIs, Git/GitHub, PostgreSQL, Prisma, Tailwind CSS, PWA, Three.js, Arduino, Burp Suite, Nmap, Metasploit, IBM Watson Studio

Core Competencies: Full-Stack Web Development, Ephemeral Cryptography, Penetration Testing, Vulnerability Assessment, IoT Systems, Microcontroller Programming, Data Structures & Algorithms, Machine Learning & Deep Learning, Computer Vision & NLP

Experience

Founder & Solo Developer – BunkYard

bunkyard.me

2025 – Present

Jodhpur, India

- Founded a campus lifestyle brand and built its full-stack e-commerce system, processing 200+ orders to date.
- Integrated Cashfree PG and engineered automated order-processing workflows and email status systems.
- Orchestrated technical operations and collaborated with sourcing and delivery teams to expand to multiple colleges.

Founder & Solo Developer – MyDiary.page

mydiary.page

Nov 2025 – Present

- Architected and launched a privacy-first journaling SaaS, growing to 500+ Monthly Active Users (MAUs).
- Engineered a subscription model with secure payment flows, acquiring 100+ paying customers.
- Designed secure chunked storage using Prisma/PostgreSQL, and built automated data backup/export utilities.

Trainee – Ethical Hacking & Penetration Testing

Centre for Development of Advanced Computing (CDAC)

May 2024 – Jun 2024

Noida, India

- Conducted penetration testing and vulnerability assessments on Windows environments using industry-standard tools.
- Performed reconnaissance, enumeration, and exploitation exercises to identify security weaknesses.
- Documented security findings and collaborated with team on remediation strategies and secure coding practices.

Team Lead – Samsung Innovation Hackathon

Samsung

September 2024

Lucknow, India

- Led a cross-functional team to develop and deliver a functional prototype under tight deadline constraints.
- Managed technical planning, task distribution, and rapid problem-solving to ensure project completion.

Projects

Full portfolio: udtc.me/projects

Vesper – Campus Companion PWA — *Next.js, React, TypeScript, Tailwind, PWA* — vesperapp.fun

2026

- Engineered a campus Progressive Web Application (PWA) centralizing utilities for 4,000+ students at IIT Jodhpur.
- Consolidated academic timetables, mess menus, maps, and notices into an offline-capable, mobile-first interface.

1Key – Ephemeral End-to-End Encrypted Messaging — *Node.js, TypeScript, Web Crypto API* — 1key.udtc.me

2026

- Architected a privacy-first messaging platform with zero-identity login and E2EE using the Web Cryptography API.
- Designed secure client-side key exchange and self-destructing states to guarantee absolute message confidentiality.

Publications

Optical-First ISAC Architectures: Hardware Enablers & 6G Standardization

Author

2026

[View Publication](#)

Review paper investigating optical-domain ISAC, photonic hardware enablers, and B5G/6G standards.

A Comprehensive Review of Wavelet-Based Image Compression Techniques

Co-author

2025

[View Publication](#)

Advised by Project Guide

Research paper investigating sub-band coding, wavelet transforms, and noise reduction algorithms.

Certifications

Artificial Intelligence Fundamentals – IBM SkillsBuild

[Credential]

Windows Vulnerability & Security – CDAC

[Credential]

Python Development Certification

[Credential]
